

The So-called Science of Evolution: Or Evolutionist, a Species or spectrum of

Atheism: David Carr

Psalm 14:1 – The fool hath said in his heart. They are corrupt; they have done abominable works...” Proverbs 17:21, “He that begetteth a fool doeth it to his sorrow. The father of a fool has no joy. Psalm 53:2 – God looked down from heaven upon the children of men, to see if there were any that did understand, that did seek God.

The word “**Fool**” means “Stupid” “foolish” “A vile person”

Evolution is a process of change in a certain direction. A process of working out or developing...a process described by “theory.”

Romans 1:25, they changed the truth of God into a lie and worshiped and served the creature (created thing) rather than the Creator...”

Evolution is propaganda that promotes a doctrine of the atheist for the purpose of the denial of Almighty God’s existence.

A vast majority of scientist who deny the existence of God are either atheist or agnostic!

They believe in a definition of naturalistic science and hold that life evolved entirely without any intervention of a higher Being. In justifying an explanation for their belief, they offer an alternative explanation in the theories of evolution. To believe in evolution

is to deny the existence of Almighty God, which is to be a fool. (The Scriptures projects a fool as an evil person). A gentleman commenting in the Tennessean newspaper said, “Commenting as both a scientist and Christian...The Creation Museum represents ignorance of the worst sort. A Christian responds, “I believe the universe, earth, were created by intelligent design by a Superior Being...GOD. I find it much more implausible to believe in a scientific theory that everything living evolved from a primordial soup and just happened. Maybe a tornado could blow through Home Depot and spit out a house. Tell me who has to have the greater faith to believe what they believe. A Tennessean writes: what makes me the critic, if I choose to point out the Creation Museum in KY. Doesn't represent the scientific view of the earth's biological history. Basing it on multiple tests my multiple independent researchers.

Thomas Paine (1737-1809) ...an Anglo-American and British Political Writer, soldier in the American Revolution and deemed a radical democrat said.....Jan. 16, 1797...It has been the error of the schools to teach astronomy and all the other sciences and subjects of natural philosophy as accomplishments only: ... they should be taught theologically, or with reference to the “Being” who is the author of them, for all of the principles of science are of Divine origin. Man cannot make, or invent, or contrive principles. He can only discover principle. When we examine an extraordinary piece of machinery, an astonishing pile of architecture, a well executed state or a highly finished painting where life and action are imitated ... our ideas are naturally led to think of the extensive genius and talents of the artist. When we study the element of geometry, we thing of Euclid. When we speak of gravitation, we think of Newton. How then is it, that when we study

the works of God in the creation, we stop short and do not think of God. It is from the error of the schools in having taught those subjects as accomplishments only, and thereby separated the study of them from the Being who is the author of them. Instead of looking through the works of creation to the Creator himself, they stop short and imply the knowledge they acquire to create doubts of His existence.”
